

The thing I learned & was interested in today's lecture was the discussion upon 季言 吾 an important aspect of Haiku. I found it interesting that even the fact of cats mating can be condensed into this aspect as they mate mainly in Spring. I did get PTSD from the mention of the first person to use Haiku.

俳句への業感

P.S. I wish we'd actually get to make a Haiku mid presentation.

### Haiku Lecture

The class was really enjoyable. I learned a lot of things and could grasp the essence of haiku. I would like to know more about history but it's short to cover such a large topic.

Thanks you very much for the class,

Thanks you very much for the class,

Good class, i would like to explore haikus more. Unfortunately, it still didn't get how to write haikus, so i would love to add some practice with the feedback to the class

Very informative.

I enjoyed learning about Haiku.

It was a good class.

I chose to take the photo because I was overcome by the scenery and a sense of ease. I felt a strong smile on my face, and realized that being there made me deeply happy. My worries melted and my heart felt open. I embraced the nature and felt whole.

I really enjoy today's lecture in Japanese Haiku because

I learned the interesting Japanese culture and even Japanese language's beauty. In my home college, I learned Haiku before and did a short presentation on it and I really enjoyed Shiki (子規)'s works. I've never made Haiku in Japanese before but I may try it this time because my Japanese level improved these years. Also, I think the 季語 and 切字 are beautiful and really make the Haiku with aesthetic atmosphere. (eg. 紅葉. 雪. 桜)

It is very interesting to learn about Haiku, I feel great to learn about Japanese literature and history. Teacher is very knowledgeable.
