

▷ this class is interesting

▷ New things to think about

▷ I will try to learn more about Haiku :D

~~art~~  
~~This class is interesting.~~

~~Because~~

I think this is an interesting class. I was intrigued by the workshops and artpieces. It inspired me of ~~for~~ my future art developments.

g to learn about Haiku, I feel great to  
literature and history. Teacher is very knowledgeable.

I chose to take the photo because I  
was overcome by the scenery and a sense  
of ease. I felt a strong smile on my  
face, and realized that being there  
made me deeply happy. My worries  
and my heart felt open. I embraced

ive.

my about Haiku.

class.

The course ~~is~~ designs <sup>are</sup> really well! I love all different kind of arts that we can experience on class! That's a very special and unique experience for me! I learn a lot and have a better understanding about Japanese arts and culture. The professor is very passionate and helpful! I hope we could have more these type of course! And maybe could teach more about Japanese music, kabuki, noh theatre and ceremony!

I really enjoyed this class,  
and learning about the "rules" of  
Japanese Haiku! ☺  
And the importance of feeling:

I have always heard about haiku. However, I was never interested in it.

After this class, I want to read more about it and learn more. I think it will make learning Japanese more fun.

I feel the workshop was informative & the lecturer clearly explained the form & cultural importance of haiku.

I especially appreciated the examples of haiku & the interactive portion of the lecture. I also enjoyed the historical explanation of the haiku.

I enjoyed the small lecture, it was very informative and interesting. I have written Japanese Haiku before but it was nice to learn in depth about the history and the people.

It is interesting to learn the history of haiku and experiences some of the different kigo.

It is also interesting to see the differences between Japanese haiku and haiku in other languages as they express different senses.
